Pre-title text. (If left empty, the pre-title from the front page will be used instead)

Verkkonäyttely 2024

Barabra

1. **Exhibition main title:** The main title text of the exhibition.
 2. **Hero text:** Text displayed at the top of the page. **IMPORTANT:** Pressing **Enter** between lines will create a line break with two paragraphs. To move down only one line without extra spacing, press **Shift + Enter**. This applies to all text fields on the website.
 3. **Featured image:** The exhibition image displayed in both the main page and subpage headers. It also appears in the exhibition list on the homepage.
 4. **Top heading text:** Text displayed above the exhibition title. If the field is empty, the top heading from the homepage will be used (if it has been added to the homepage).
- a. **Exhibition excerpt text (Homepage):** This text is shown on the homepage. If the field is empty, the exhibition description text (3.) will be used. The purpose of this field is to allow a shorter text to be used on the homepage (If left empty, the excerpt will be used as the hero text, shortened to 18 words).

- b. **Site template:** Set this to “main-exhibition-template.php”. All main exhibitions use this template.
- c. **Parent:** For main page, this should be set to None.

Restricts the visibility of this Page to members of the chosen groups.

5. **Hero | Background color:** Sets Hero’s section background color.

6. **Content | Background color:** Sets content background color.

7. **Text-content** in the Hero section.

8. Links to the exhibition’s subpages. Two style options, one can be selected:

- **Show text only (default display):** Displays the exhibition subpage’s title and excerpt text without the featured images:

Juominen Quis autem vel eum iure reprehenderit qui.Lorem... →

Mistä ruoka tuotiin Quis autem vel eum iure reprehenderit qui.. →

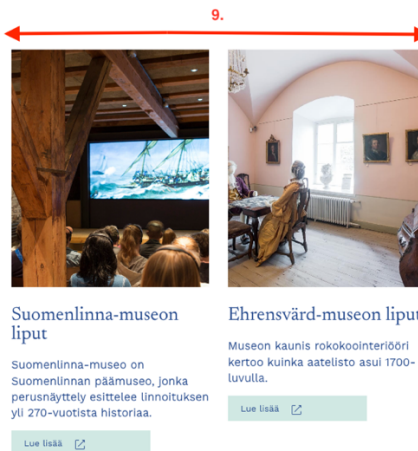

Säädyn Quis autem vel eum iure reprehenderit qui. →

Barabra

- **Show image and text:** Displays the exhibition subpage's text along with his featured image. If no image is found, the page automatically uses the "plain text" style in that spot (if featured image is not added).

9. Product list: Here you select the products to be displayed in the products section at the bottom of the page. The selected products will also appear on all the exhibition subpages. If no products are added, the section will not be shown. Products are fetched from Suomenlinna Johku API. **Don't use this field.**

10. For the main exhibitions (not subpages), it is recommended to select a category— in this case, "Näyttely," which corresponds to an exhibition— to enable future filtering and searches.

Accordion block (Haitari-osio)

This element allows you to create an accordion block, with the ability to add items to each row.

You can add different elements to the accordion, such as:

- **Text content:** images or text can be added here.

Barabra

- **Recipe table:** This creates a recipe table (or another table) in the accordion. A new row can be added using the blue button.

Haltarin sisältö

1 Reseptitaulukko

Resepti taulukko *

	Määrä	Aineosa
1	1 DL	Maitoa

[Lisää rivi taulukkoon](#)

- **Image gallery (inside the accordion row):**

You can add an image gallery within the accordion, allowing different images in each section.

Labore et dolore magna aliqua

- **"Print recipe"-button:**

This will add a print button under the recipe text, allowing the user to print the recipe as a PDF.

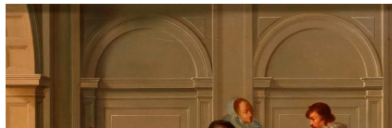

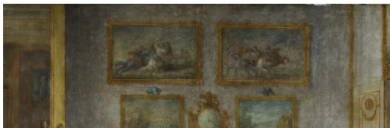

Image gallery (Kuvagalleria)

An element that allows you to create a new image gallery block.

Kuvagalleria

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.

In the gallery configuration, images can be added to or removed from the gallery.

This information is important so that it appears in the gallery lightbox. If the fields are empty, only the image will be displayed in the lightbox.

Margin top (for navigation links) (Ylämarginaali sivupalkissa)

This is a small element that adds extra top margin between one page link in the list and the others. It is intended to visually separate, for example, private pages from regular pages (like “Oppaille”).

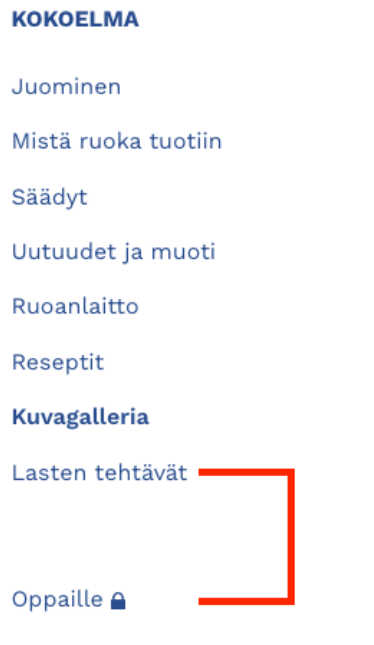

Ylämarginaali | alasivun sivupalkissa

Lisää yläreunamarginaali valitulle sivupalkin linkille

Tämä kenttä lisää yläreunamarginaalia alasivun vasem

Barabra

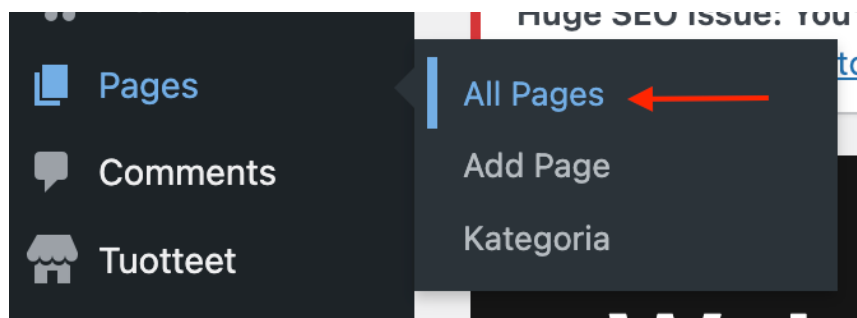

If set to **Ei** (default), it does not apply. If set to **Kyllä**, the separation is applied, as shown in the example below.

The recommendation is to use '**Kyllä**' only on the 'Oppaille' page.

Page order (for admins or page owners)

In the WordPress Dashboard (Pages), existing pages can be moved and ordered (with drag and drop option), which also changes the order of pages in the subpage menu.

We can reorder the subpages within a page to display them in a different order simply by dragging and dropping the pages.

Image options

In this block, we will see how to insert description text, caption text (for the source of the image), in the different blocks. The easiest way to do that, is going directly to “**Media → Library**”. Then click on the image you want to edit and add the texts.

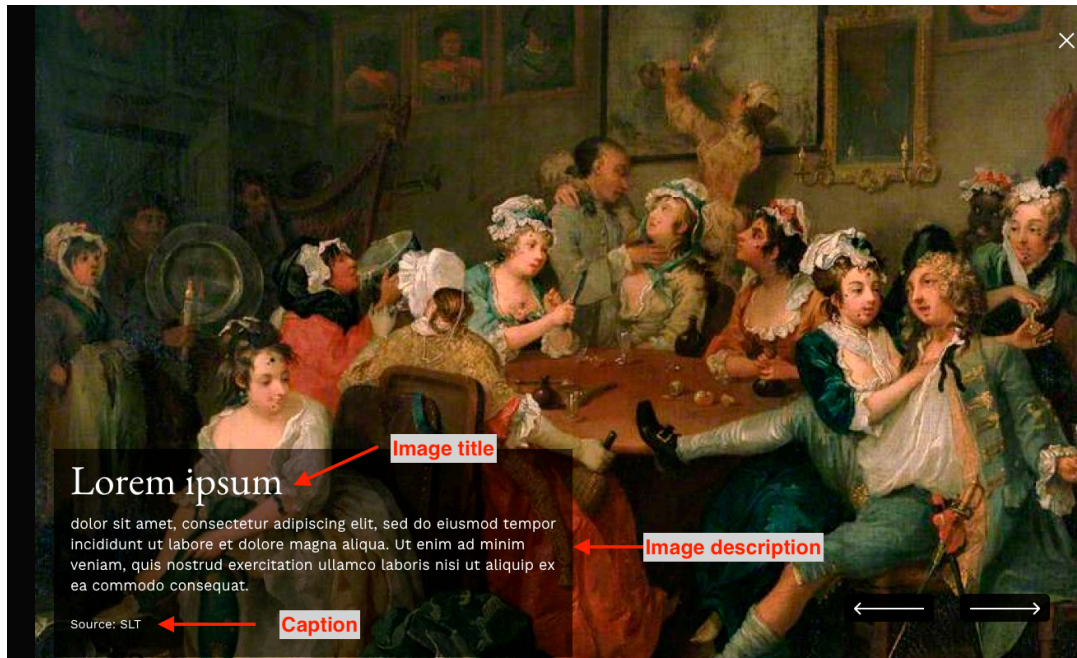

When you click on it, you will see this display:

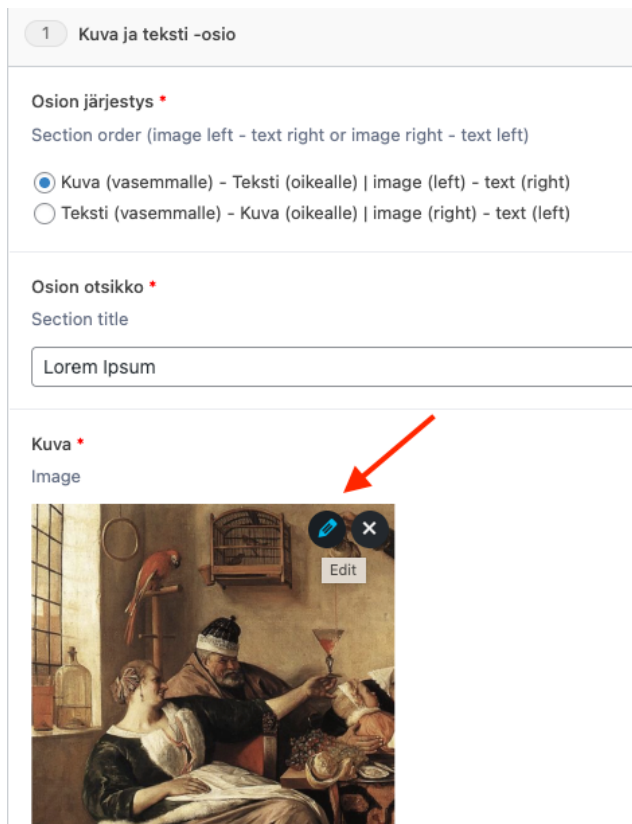

1. **Alternative text:** Text for screen readers. If left empty, screen readers will skip the image. Use this only for images that convey information; skip purely decorative images.
2. **Image title:** This will be displayed as the title in image galleries. See the example image below the list for its placement.
3. **Caption:** Use this field to indicate the source of the image.
4. **Description:** A description of the scene or additional context about the image, such as its story. This description will also appear in the image galleries.

Barabra.

If you add an image directly in the “**image and text block (kuva ja teksti -osio)**”, when you click on the edit pen, you will see this screen.

This works in the exact same way than the **Media library** fields. Just fill them.

As you can see, there is no Description field. This is because WordPress does not allow images added via the text editor to have a description. This is not a problem, as only the Alt text and **Caption** fields are needed here.

Use **Alt** for the alternative text and **Caption** for the source. Add them and click **Update**.

Remember to **save** the post afterward.
